

## Stargate Project

**\$500 Billion in Data Centers and it's just getting started.**

**The Stargate Project in Abilene, Texas, backed by OpenAI, SoftBank, and Oracle, is building what could be the largest AI data center network in the world. 10 hyperscale sites. 100,000+ jobs. All by 2029.**

**At Raptor Power Systems, we know that when the stakes are high uptime isn't optional. That's why our Power Distribution Units (PDUs) are engineered to thrive in mission-critical environments.**
